

## Autodoc – Firewall Configuration Report Generator

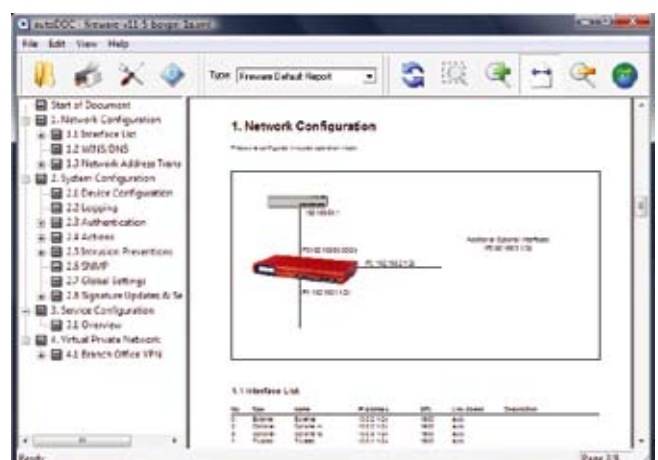

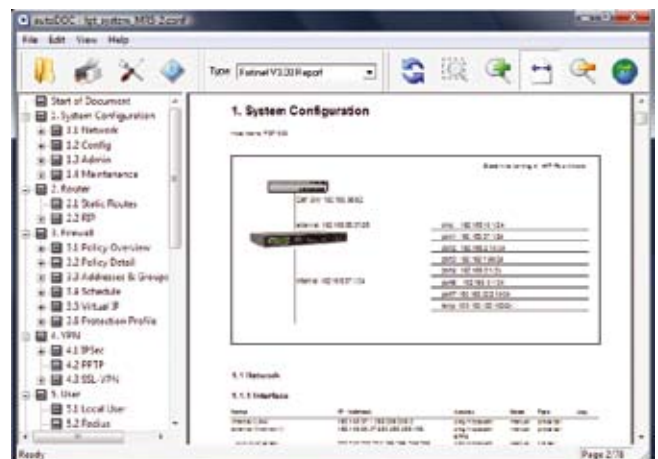

Documentation of your firewall configuration has never been this easy: Autodoc, the «Firewall Configuration Report Generator» by BOLL automatically generates complete reports for firewalls by WatchGuard, Fortinet or SonicWALL.

### Autodoc - the ingenious reporting tool

Autodoc makes generating detailed documentation of firewall settings easier than ever before. The solution, which was developed by BOLL and has already been deployed world-wide, automatically generates a printable, concise report from a configuration data file. The report can then be converted into a PDF document using Adobe Acrobat.

### Use Autodoc to

- generate comprehensive, professional documentation for your firewalls
- print all firewall settings for review
- provide management, auditors and customers with accurate information
- achieve seamless documentation of altered settings
- compare two different firewall configurations (manually, on-screen or via the print-out)
- align the VPN settings of two firewalls
- have your firewall settings with you when on business trips

## Comfortable and quick

Manual documentation of firewall configurations is a thing of the past. Autodoc quickly and automatically generates concise, detailed reports. If the firewall configuration is altered, Autodoc allows you to generate an updated report within seconds. The program is both easy to use and efficient.

Moreover, Autodoc also enables convenient on-screen reviewing of a configuration. The index has links to the respective sections.

Autodoc licenses are available for the following firewalls:

- WatchGuard (WFS, Fireware Pro, Vclass, X Edge, SOHO)
- Fortinet (all types)
- SonicWALL (NSA-Series)

## Hardware requirements

Standard PC with Microsoft Windows XP or Vista

## Licensing system

- License packages per brand (WatchGuard, Fortinet, SonicWALL)
- Packages for 1, 10, 20, 50 or an unlimited amount of firewalls (per firewall brand)
- Headers and footers can be formatted to designate the client company from the 10 firewalls package license upwards

You can find further information and a demo version at: [www.autodoc.ch](http://www.autodoc.ch)
